Re: The Studer Family Children's Hospital at Sacred Heart

Regency Electric Company, Inc. performed the electrical work on the Studer Family Children's Hospital at Sacred Heart for Hoar Construction. The Sacred Heart project was a 188,000 square foot hospital expansion in Pensacola, Florida. The hospital contains the latest medical technology, including a fully integrated emergency department with trauma and 72 NICU rooms.

Regency Electric completed this complex electrical installation not only on time, but against an extremely aggressive construction schedule while maintaining extraordinary professionalism and the highest quality installation. The project had multiple challenges, including a restricted construction site and maintaining an operating facility which we tied into on 4 different levels, including a single-story vertical expansion over the active LDR department. The electrical work was subject to multiple AHCA and Fire Marshall Inspections and all were passed promptly and in accordance with the project schedule.

With Regency's work, we were able to satisfy the expectations of our Client. The end product resulted in a beautifully constructed facility that we are proud of and we look forward to the opportunity to work with Regency on future projects.

Sincerely,

A handwritten signature in black ink, appearing to read "David J. Roberts". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
