**Regency Electric**

Regency Electric partnered with us on the Mayo Clinic Destination Medical Building (now named The Mangurian Building) and performed admirably. Regency Electric was instrumental in the overall success of this project being completed on time and within the Owner’s budget. It was a total team effort, but Regency Electric went over & beyond countless times to ensure the project was completed within an aggressive project schedule. I would not hesitate, and look forward, to partnering with Regency Electric on future projects.

Sincerely,
